

At VISPCenter we provide unprecedented flexibility and reliability for your ISP business. It means that you never have to worry about a massive, lengthy communication outage or a dialup wholesale provider going out of business.

We provide you two phonebooks, each from a unique aggregated network. You can switch between the two networks at will, without restrictions, and without additional cost.

Various factors may cause a long-term connectivity failure. For example, your wholesale provider could be taken down by a Denial of Service (DoS) attack or by a malicious virus or worm. Outages may also occur due to technical or non-technical reasons like fiber cable cut, fire, earthquake, flood, or bankruptcy. Whatever the reason, the result is the same; your business will come to a halt.

- > **Ensure service continuity and uptime**
- > **Thousands of backup dialup numbers**
- > **Redundant architecture at no surcharge**
- > **Two dialup networks for the price of one**
